Dear Resident

Upgrade of Electrical Supply – Works Complete

As you are aware the council has been working in partnership with UKPN over the last few weeks to increase the capacity of the electrical services to your homes. Following the last of the shutdowns on Tuesday 17 October I am pleased to tell you that this work is now complete. Thank you all for your patience, this is very much appreciated.

However despite this great news that the power supply to your block has been increased, you should note that before any new electrical cookers and/or hobs are installed by Keepmoat, their electricians will be surveying the internal electrical installation in the kitchen. If your property is not one that has been rewired in recent years, there is a possibility that some remedial works may be required in advance of the new appliance installation. Keepmoat will advise you if any remedial works are required and make any necessary arrangements.

I hope that the above is helpful, however if you have concerns or queries in relation to this, please do not hesitate to contact any of those detailed over the page.

Yours faithfully

Mike Tyrrell
Director of Ledbury Estate
